

Property & Casualty Operations' net operating income was \$261 million for the second quarter of 2017 as compared with \$229 million in the prior year quarter. This increase was driven by improved current accident year underwriting results which more than offset lower net investment income. Catastrophe losses were \$24 million, after tax, as compared with \$58 million, after tax, in the prior year quarter.

Net operating loss for our non-core segments improved \$6 million for the second quarter of 2017 as compared with the prior year quarter. The improvement was primarily due to a \$9 million improvement in the Life & Group Non-Core segment driven by the Long Term Care business.

Net investment income, after tax, was \$344 million for the second quarter of 2017 as compared with \$362 million in the prior year quarter. The decrease was driven by limited partnership investments, which returned 0.7% as compared with 1.8% in the prior year quarter. Income from fixed maturity securities, after tax, for the second quarter of 2017 increased \$5 million as compared with the same quarter in 2016, primarily due to an increase in the invested asset base.

Property & Casualty Operations

"I am pleased with our second quarter results and overall operational progress. Improvement in both our underlying loss ratio and expense ratio created one of our best underwriting quarters in the past decade," said Dino E. Robusto, Chairman and Chief Executive Officer of CNA Financial Corporation.

- Net operating income decreased \$28 million for the second quarter of 2017 as compared with the prior year quarter, primarily due to lower favorable net prior year loss reserve development and lower net investment income.
- The combined ratio increased 4.5 points while the combined ratio excluding catastrophes and development improved 1.2 points as compared with the prior year quarter. The loss ratio increased 3.8 points driven by lower favorable net prior year loss reserve development partially offset by an improved current accident year loss ratio. Catastrophe losses were \$5 million, or 0.8 points of the loss ratio in the second quarter of 2017, as compared to \$9 million, or 1.3 points of the loss ratio, for the prior year quarter. The expense ratio increased 0.7 points as compared with the prior year quarter.
- Net written premiums increased \$25 million as compared with the prior year quarter. The renewal premium change was 1% driven by rate and retention remained strong at 88%. New business was modestly higher and broad-based.

- Net operating income increased \$23 million for the second quarter of 2017 as compared with the prior year quarter, due to improved underwriting results partially offset by lower net investment income.
- The combined ratio improved 8.4 points and the combined ratio excluding catastrophes and development improved 3.2 points as compared with the prior year quarter. The loss ratio improved 7.4 points due to an improved current accident year loss ratio and higher favorable net prior year loss reserve development. Catastrophe losses were \$35 million, or 4.8 points of the loss ratio, in the second quarter of 2017 as compared to \$55 million, or 8.0 points of the loss ratio, for the prior year quarter. The expense ratio improved 1.2 points as compared with the prior year quarter, due to lower employee costs.
- Net written premiums increased \$27 million as compared with the prior year quarter, driven by higher new business within Middle Markets. Renewal premium change was 2% driven by exposure growth as average rate was flat. Retention decreased to 82%.

- Net operating results improved \$37 million for the second quarter of 2017 as compared with the prior year quarter, driven by improved underwriting results and the favorable period over period effect of foreign currency exchange gains and losses.
- The combined ratio improved 18.5 points and the combined ratio excluding catastrophes and development improved 14.2 points as compared with the prior year quarter. The loss ratio improved 17.0 points, primarily due to an improved current accident year loss ratio driven by a lower level of large and catastrophe losses, partially offset by lower favorable net prior year loss reserve development. There were no catastrophe losses in the second quarter of 2017 as compared to \$21 million, or 10.6 points of the loss ratio, for the prior year quarter. The expense ratio improved 1.5 points in the current quarter, primarily due to higher net earned premiums.
- Net written premiums increased \$25 million for the second quarter of 2017 as compared with the prior year quarter. Renewal premium change was 4% driven by exposure growth as average rate was flat, and retention improved to 78%. New business was also higher in the quarter.

Financial Measures

In the evaluation of the results of Specialty, Commercial and International, management utilizes the loss ratio, the expense ratio, the dividend ratio and the combined ratio. These ratios are calculated using financial results prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The loss ratio is the percentage of net incurred claim and claim adjustment expenses to net earned premiums. The expense ratio is the percentage of insurance underwriting and acquisition expenses, including the amortization of deferred acquisition costs, to net earned premiums. The dividend ratio is the ratio of policyholders' dividends incurred to net earned premiums. The combined ratio is the sum of the loss, expense and dividend ratios.

This press release may also reference or contain financial measures that are not in accordance with GAAP. Management utilizes these financial measures to monitor the Company's insurance operations and investment portfolio. Net operating income, which is derived from certain income statement amounts, is used by management to monitor performance of the Company's insurance operations. The Company's investment portfolio is monitored by management through analysis of various factors including unrealized gains and losses on securities, portfolio duration and exposure to market and credit risk. Based on such analyses, the Company may recognize an other-than-temporary impairment (OTTI) loss on an investment security in accordance with its policy, or sell a security, which may produce realized gains and losses.

Net operating income (loss) is calculated by excluding from net income (loss) the after-tax effects of i) net realized investment gains or losses, ii) income or loss from discontinued operations and iii) any cumulative effects of changes in accounting guidance. The calculation of net operating income excludes net realized investment gains or losses because net realized investment gains or losses are largely discretionary, except for some losses related to OTTI, and are generally driven by economic factors that are not necessarily consistent with key drivers of underwriting performance, and are therefore not considered an indication of trends in insurance operations. Management monitors net operating income (loss) for each business segment to assess segment performance. Presentation of consolidated net operating income (loss) is deemed to be a non-GAAP financial measure.

For reconciliations of non-GAAP measures to the most comparable GAAP measures and other information, please refer herein and/or to CNA's most recent 10-K on file with the Securities and Exchange Commission, as well as the financial supplement, available at www.cna.com.
